PUBLIC INSTRUCTION
Office of System & School Improvement

May is Career Connected Learning Month!

Are you looking to get your middle and/or high school students connected to something hopeful, inspiring and future-focused while they learn from home? Some incredible career exploration opportunities with Washington companies are coming this May!

Every day at 3:30pm, **starting May 4th**, students can engage in 30-45 minute live sessions hosted via Zoom and live streamed on YouTube. Students will hear about Washington-based jobs that might align with their interests and goals, and engage in employer-created challenges. Information and recordings of previous discussions will be posted at CareerConnect@Home.

Each week there is a different theme and different companies that will be sharing information about their jobs and answering students' questions. Here's the breakdown of each week's theme: (click [here](#) to read more....)
